

Run the client

PrivateWave will automatically connect to secure VoIP server in the background each time you turn on your phone. When an Internet connection is available, you can:

- Start PrivateWave application.
- Receive and dial secure calls.

On Android and BlackBerry devices it is possible to disable auto-start feature. It is not possible to disable it on iPhone devices.

 **To make a secure call the called party must have PrivateWave running on his phone and be connected to the Internet as well!**

Start PrivateWave on BlackBerry

To start PrivateWave select PrivateWave icon in the application menu.

All other application functions are accessible from the PrivateWave menu.

To open PrivateWave menu on BlackBerry, select PrivateWave icon:

| Step 1 | Step 2 |
|--|---|
| Blackberry OS 7 | PrivateWave starts |
|  |  |
