Run the client

PrivateWave will automatically connect to secure VoIP server in the background each time you turn on your phone. When an Internet connection is available, you can:
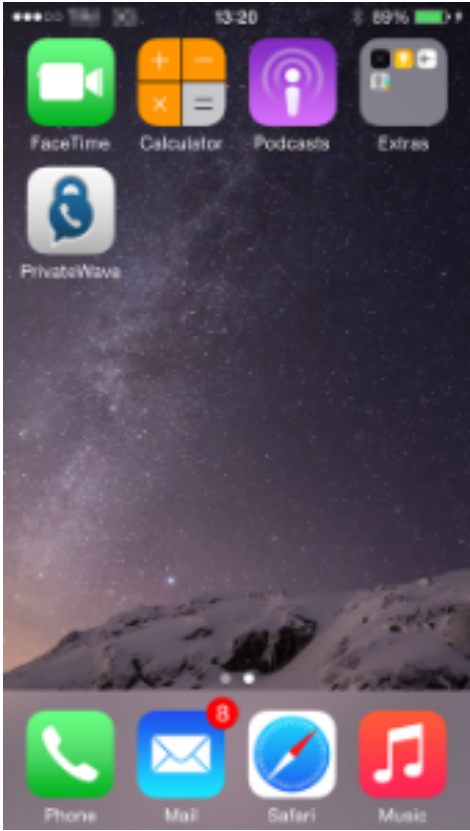

- Start PrivateWave application.
- Receive and dial secure calls.

On Android and BlackBerry devices it is possible to disable auto-start feature. It is not possible to disable it on iPhone devices.

> ⊘ **To make a secure call the called party must have PrivateWave running on his phone and be connected to the Internet as well!**
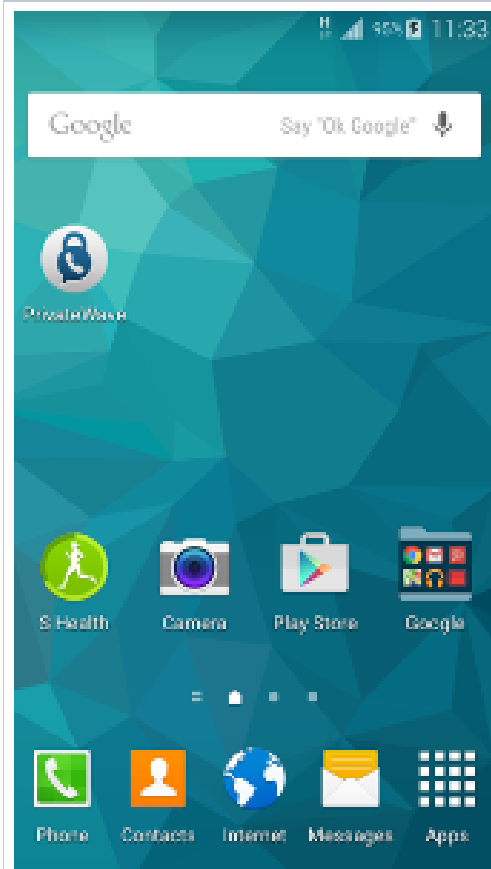

Start PrivateWave on iPhone

All application functions are accessible from PrivateWave main UI.
