PrivateGSM Android 14.1.3869

Release Notes

Present release is about two pivots:

1. Fixed audio drop timeout so to improve secure call roaming
2. Improved sync between UI and secure voice engine

We also fixed some minor bugs along the way.

PrivateGSM - All editions - Version 14.1.3869

Improvements

- [PGDR-896] - Raised network failure timeout to 17 seconds (aka RTP timeout)

Fixed Bugs

- [PGDR-869] - Show contact's number once if it's repeated in contact details.
- [PGDR-898] - If one contact is duplicated, then in both "Contacts" list and "Know" contacts list show it once only.
- [PGDR-901] - Wrong hang up screen displayed if callee has duplicated entries.
- [PGDR-899] - "Favourites" contact list did not refresh automatically.
- [PGDR-885] - "Known Contacts" list might be empty when getting PrivateGSM foreground.
- [PGDR-888] - Bad sync between call screen and user actions if they are taken too quickly.
- [PGDR-890] - On bad network condition the call screen appears late.
- [PGDR-892] - "Send message error" notification can be related to the wrong contact.
- [PGDR-894] - When getting foreground PrivateGSM forgets last screen opened.
