Release Notes

Present release of PrivateWave for BlackBerry offers an important new feature: **PIN protection**. It's now possible to setup one personal PIN to prevent others access your secure call engine and messages. This PIN is specific of PrivateWave and thus is not related to any OS PIN.

Along with PIN protection we performed also some minor bug fixes. Please read following detailed notes.

PrivateWave - All Editions - Version 14.2.3914

Improvements

- [PGBB-1045] - Application is protected by an application PIN
- [PGBB-1057] - Certification of BB 9720

Fixed Bugs

- [PGBB-1065] - Licence expired if user's account got provisioned twice on the same device.
- [PGBB-1069] - License expired error during activation
- [PGBB-1072] - Under specific circumstances PrivateWave reported wrong call status (3 green dots even in connection phase)
- [PGBB-1084] - Removed one deadlock
