14.2.2780

Release Notes

Present release of PrivateWave completes full support for iOS 8 and fixes some minor bugs mostly UI related due to newer iOS features.

PrivateWave - All Editions - Version 14.2.2780

Improvements

- [IOS-1085] - Deal with contact's thumbnail instead of hers full image
- [IOS-1080] - iOS 8 full certification

Fixed bugs

- [IOS-982] - "User is temporary unavailable" view blocks answering a new call
- [IOS-1095] - Application killed and restarted every hour on iOS 8
- [IOS-1052] - Composer is occupying almost all screen, because autocomplete and suggestion are added to system Keyboard
- [IOS-1100] - DTMF keypad uses a low-resolution image
- [IOS-1094] - When starting in background, application is stuck for almost ten minutes before the SIP engine starts up
- [IOS-1083] - Connection towards PrivateServer gets interrupted (for NETWORK ERROR) and are not established anymore
- [IOS-1087] - Can clone licenses with device backup/restore
- [IOS-1091] - Can't access device id when starting up in background on a PIN-locked device
- [IOS-1102] - Connection towards PrivateServer gets interrupted and are not established anymore
