PrivateServer - 14.2.5529

Latest update Unknown macro: 'page-info'

Release Notes

Release 14.2.5529 fixes some bugs. Despite PrivateServer carried a version of bash vulnerable to shellshock attack, due to its internal architecture, it is not possible to exploit the vulnerability remotely (eg: via HTTP access).

This version carries an upgrade to bash to fix shellshock.

Improvements

- [PS-1823] - While creating a Conference room and setting end time minor to start time in the error message there is a mistake
- [PS-1857] - Update expired default certificate *.madama.at
- [PS-1860] - Increase username max length to accomodate email addresses

Fixed Bugs

- [PS-1307] - Audio Messages: Dialplan gets the wrong "Audio Tone" value when multiple Trunk are set
- [PS-1777] - NTP service default configuration is broken
- [PS-1850] - Error message with accented letters in login screen are rendered wrongly
- [PS-1864] - Manual modification of account password is not applied
- [PS-1889] - Shellshock fix
