

14.3.4166

Release Notes

PrivateGSM - All editions - Version 14.3.4166

Present version offers a **new User Interface** designed to improve usability and customer's experience. Along with the graphical renewal we introduced **Persistence of secure messages** and **PIN under duress** features.

We also fixed some minor bugs.

New Features

- Secure Message are Persistent (if PIN is enabled)
- New User Interface
- PIN "under duress" feature

Improvements

- [PGDR-975] - Manage multiple "Missed call" notifications
- [PGDR-980] - Add the "missing events" badge to PrivateGSM icon (for Samsung devices)

Bugs

- [PGDR-931] - PrivateGSM message overload causes application crash
- [PGDR-932] - Fixed License issue
- [PGDR-949] - Problem saving user's new password if manual modification of settings occurred
- [PGDR-978] - Disabling History does not always apply

PrivateGSM - Professional Edition - Version 14.3.4166

Here follows a list of specific corrections in Professionale Edition:

Bugs

- [PGDR-981] - Wrong screen in User Interface after the Secure Call has been interrupted by a GSM one.
