[ANDROID] PGSM Professional configuration with dual SIM - Samsung S5 Duos

How to Configure PGSM professional with dual SIM

Choose which network to use for data connection:

1. Open the phone settings **SIM Card Manager** .
2. Check both SIM are active on device .
3. From **Data service network** choose **SIM 1** or **SIM 2** for data connection (My case I will be using **SIM 2** for data connection).
