15.0.5950

Release Notes

This release carry two main new features: audio security disclaimer when bridging to untrusted telephony networks and call quality statistics.

PrivateServer - All editions - Version 15.0.5950

New Features

- [PS-136] - Administrator can set system timezone
- [PS-1953] - If user is offline and re-routing via trunk is enabled, it is now possible to rewrite prefix for improved management and routing on third party SIP PBX
- [PS-1942] - Play audio security disclaimer before bridging calls with untrusted SIP trunks
- [PS-1990] - Call Detail Records quality statistics are recorded and tracked in CDR details

Improvements

- [PS-1345] - The administrator can configure TLS cipher suites list for HTTPS service
- [PS-1922] - Support for two distinct SIP trunk failover groups
- [PS-1968] - Support customized audio file, eg: audio security disclaimer

Fixed Bugs

- [PS-1302] - Service Operator cannot delete account's data for SMS gateway
- [PS-1691] - Language change does not trigger a restart
- [PS-1898] - with multiple SIP trunks configured, CDR reports the wrong SIP trunk when a call is routed externally
- [PS-1921] - It is not possible to reset and interface configuration
