

15.0.4840

Release Notes

This version carries a User Interface redesign and a lot fixes to full support Android 5.0 Lollipop

PrivateWave - All editions - Version 15.0.4840

Improvements

- [PGDR-1061] - Android New UI Test
- [PGDR-1109] - Manage Provisioning profile with sip proxy data

Fixed Bugs

- [PGDR-1060] - Notification don't get reset after receiving messages and PrivateWave get uninstalled and reinstalled.
- [PGDR-1076] - After a crash during a call, an InCall notification icon remains on top
- [PGDR-1100] - Re-provisioning does not work if app is PIN protected

Known Issues

- [PGDR-1099] - Application icon is not updated on launcher screen after update to 15.0, due to a TouchWiz bug on samsung galaxy S5 Lollipop

PrivateWave Enterprise - All editions - Version 15.0.4840

Improvements

- [PGDR-1062] - Put secure call on hold when a GSM call is received

Fixed Bugs

- [PGDR-862] - On bad network conditions, at startup client does not connect even if it has a valid license

PrivateWave Professional - All editions - Version 15.0.4840

Improvements

- [PGDR-1079] - Enable by default messaging
- [PGDR-1095] - Trust/Untrust contact is protected by PIN authentication
