Contribute

We invite the community to contribute to Zorg development.
Zorg development activities can be done on the following areas:

- Integration within various VoIP clients and VoIP SDK
- Integration of new crypto backends
- Finding security bugs

Start downloading the sources!
We are going to setup a discussion group to support cooperation and information exchange among Zorg developers.
In order to get public inclusion of source improvements and patches we kindly ask to provide us a contribution agreement in order to keep copyright and licensing rights within the Zorg project goals, keeping the project free and open.
Contact us at zorg@privatewave.com to work together to improve ZORG!
