

15.0.3324

Release Notes

Maintenance release and support for iOS 9.

PrivateServer with certificates signed with SHA1 are still supported up to 31st of December 2015: beyond this date, a new certificate signed with SHA2 will be mandatory to work with PrivateWave for iOS 9.

PrivateWave - All editions - Version 15.0.3324

Fixed Bugs

- [IOS-1276] - Crash answering a call from a contact marked as favorite
- [IOS-1301] - Presence and messaging do no work on server with certificate signed with SHA1

PrivateWave - Professional edition - Version 15.0.3324

Improvements

- [IOS-1293] - Fixed temporary self-registration issue from US numbers
