16.0.7199

Release Notes

PrivateWave - All editions - Version

Improvements

- [PS-2375] - Cluster events can be advertised via email

Fixed Bugs

- [PS-2309] - Restore from FC14 backup does not properly set SW repositories
- [PS-2353] - System restore via WebConsole fails with large backup files
- [PS-2361] - in security and Web Session events Instead of having the client IP address that generated the event I have the server IP address in src and shost values.
- [PS-2364] - License status is not refreshed after inserting a valid activation code from WebConsole
- [PS-2366] - Call failure for "User not registered" and "User disabled" are not correctly managed via failover trunks
