

# Run the client

PrivateWave will automatically connect to secure VoIP server in the background each time you turn on your phone. When an Internet connection is available, you can:

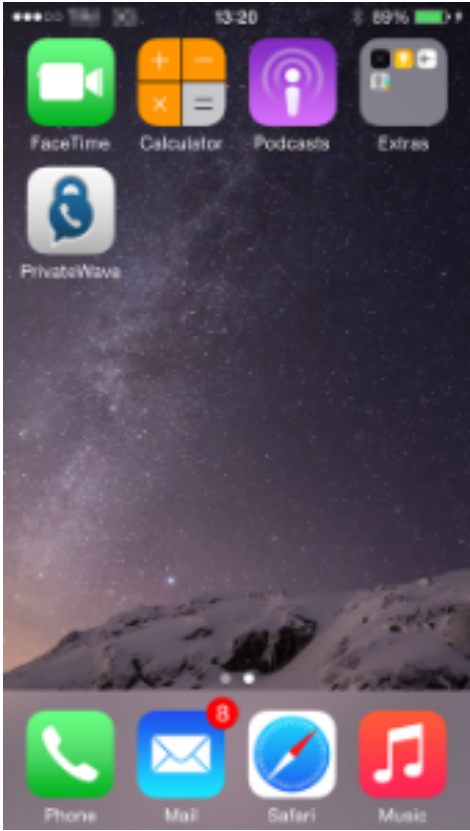

- Start PrivateWave application.
- Receive and dial secure calls.

On Android and BlackBerry devices it is possible to disable auto-start feature. It is not possible to disable it on iPhone devices.

 **To make a secure call the called party must have PrivateWave running on his phone and be connected to the Internet as well!**

## Start PrivateWave on iPhone

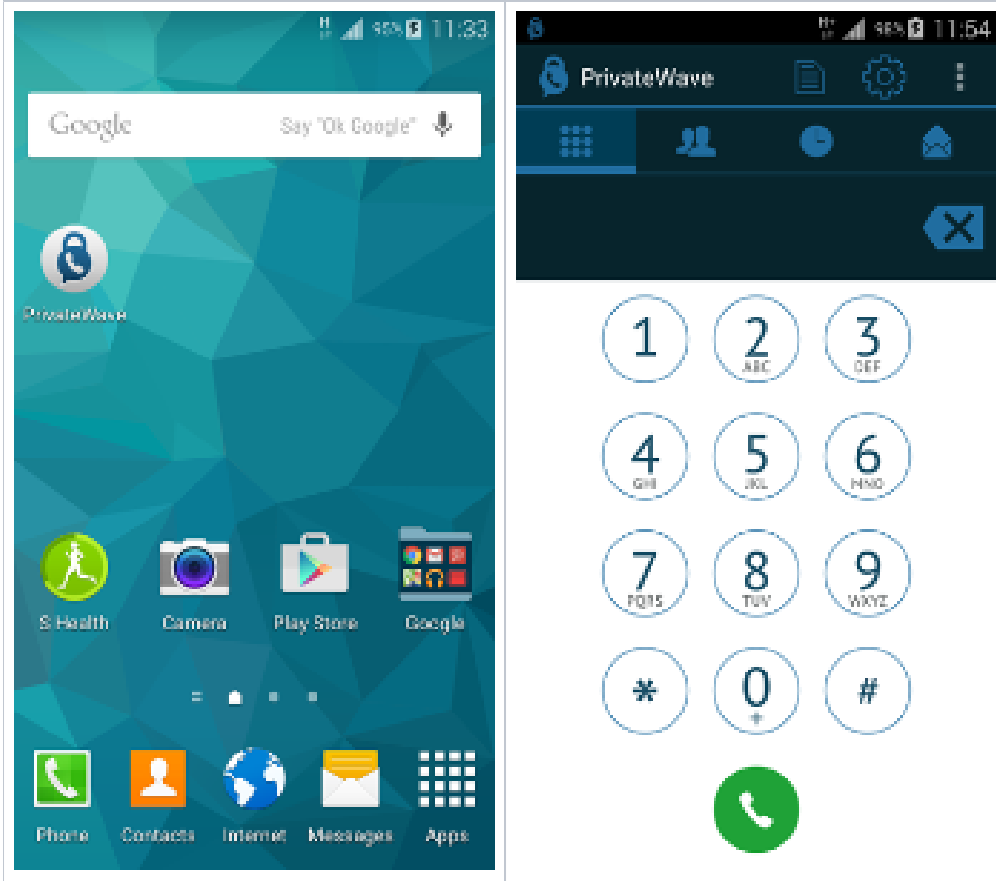

All application functions are accessible from PrivateWave main UI.

Step 1	Step 2
PrivateWave icon	PrivateWave starts
	

## Start PrivateWave on Android

To Start PrivateWave from within Android just tap on PrivateWave icon

Step 1	Step 2
Tap on PrivateWave icon	The PrivateWave menu appears

Click Back button or Home button to return the application to the background.
