

PSAM 1.3 First Access

Once completed the **PrivateServer** installation, you can connect to the **Web console** to perform your preliminary setup.

PrivateServer configure its first NIC with the IP address **10.0.0.100** and subnet mask **255.255.255.0**.

In order to configure the correct IP address of PrivateServer, you must connect your workstation (through cross-cable or network switch), to PrivateServer and configure the IP address of your workstation to 10.0.0.200/255.255.255.0. Then you will be able to reach the PrivateServer administrative interface through the web address <http://10.0.0.100>.

If your server has multiple NIC, please make sure you connect to the correct server NIC (eth0 or the first NIC).

You'll get the login request as shown in fig.1:

fig. 1: Login page

To gain access use the **default** admin login:

login: admin

you'll be moved to the welcome page, which is shown in fig.2.
