

# PrivateGSM Enterprise Activation Wizard

Before you can start using PrivateGSM Enterprise with Enterprise VoIP Security Suite you must configure a SIP account that's properly configured and enabled on a PrivateServer.  
In this section you will be guided to execute the Activation Wizard that will help you to configure the software by simply providing the server address and the user credential (id and password)

- **SIP Server:** registrar hostname
- **Username:** SIP account assigned to you
- **Password:** password used to authenticate you

## BlackBerry

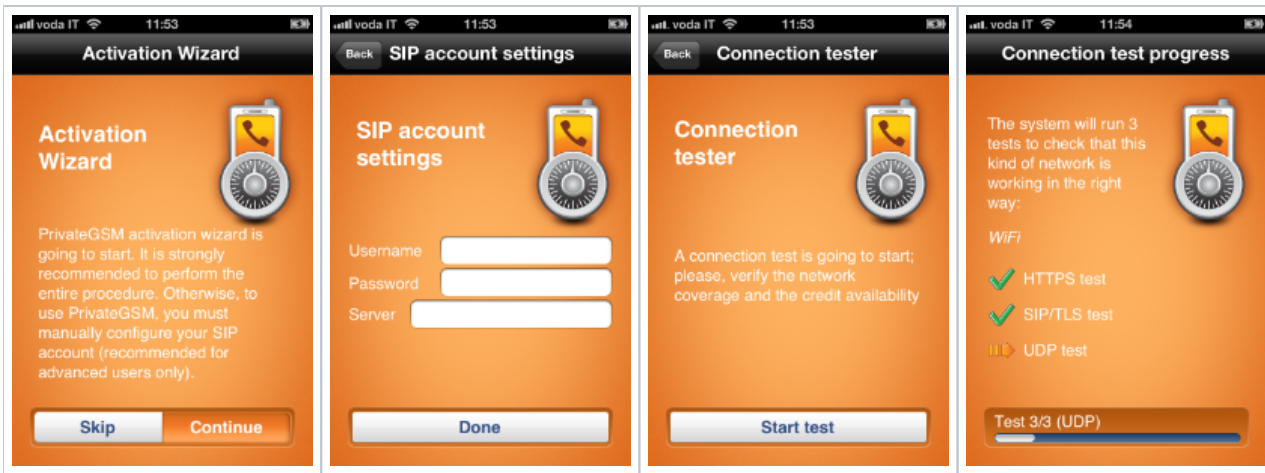

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Start Activation Wizard	Insert SIP account data	Start connection test	Connection te
			
Step 5	Step 6	Step 7	Step 8
Connection test result	Check SIP account data	Activation Wizard end	Continue to Pr
			

## iPhone

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Continue to start the wizard	Fill all the field and tap Done	Start network tester	The test progresses

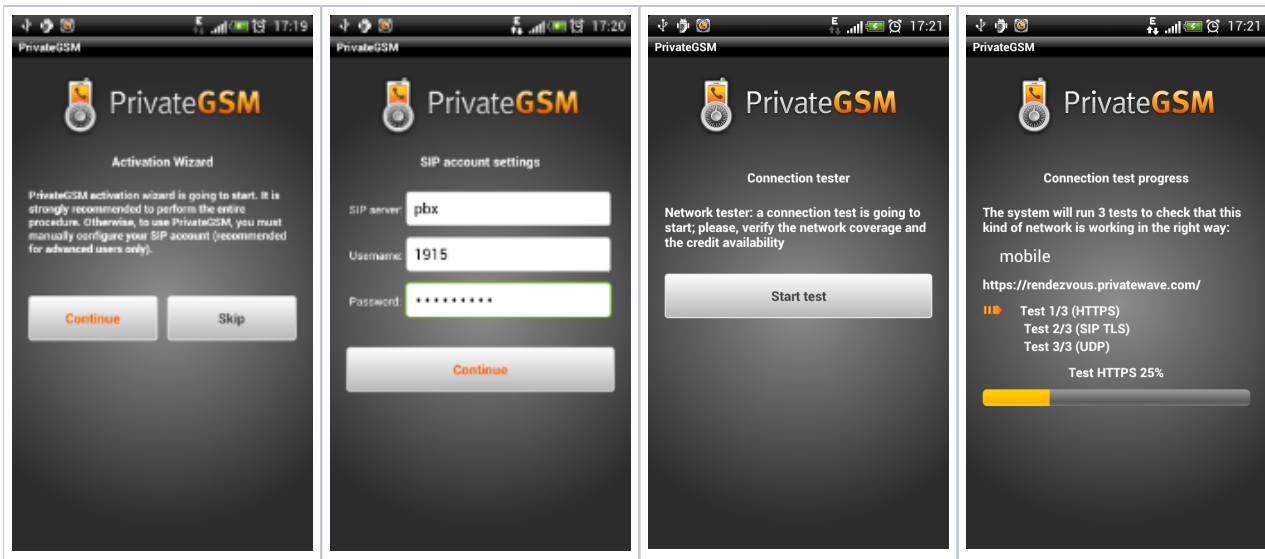

Step 5	Step 6	Step 7	Step 8
Tap "Continue"	Check your credentials	Activation complete	Tap "Done" to start using PrivateGSM

## Android

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Start Activation Wizard	Insert SIP account data	Start connection test	Connection test progress

Step 5	Step 6	Step 7
Connection test result	Check SIP account data	Activation Wizard end
