

# Android 10.6.2467

## Release Notes

PrivateGSM Android - All editions - Version 10.6.2467

### New Features

- \* [PGDR-221] - Test network protocols versus SIP server

### Improvements

- \* [PGDR-224] - Accepting incoming calls, briefly show main idle activity
- \* [PGDR-258] - Initial wizard completes on license screen. Add button DONE to close wizard and move to main screen
- \* [PGDR-260] - Add random data to UDP connection tester in order to avoid firewall protection against udp flood
- \* [PGDR-267] - Add single UDP packet timeout. If a single packet lost, continue the test but show a "Failed test" screen
- \* [PGDR-270] - Enable, by default, obfuscation in all editions
- \* [PGDR-272] - Enable by default logging on clients

### Fixed Bugs

- \* [PGDR-148] - Music does not stop when dialing a secure call from the device
- \* [PGDR-225] - Elapsed time is slower than realtime and shorter than actual call duration
- \* [PGDR-232] - During a call, call timer display wrong duration
- \* [PGDR-235] - Date format in recent log is not localized
- \* [PGDR-239] - License status switch to unknown for a while on network change
- \* [PGDR-240] - Reconnection toast is shown application is not on screen
- \* [PGDR-241] - Log rolling create infinite empty log file
- \* [PGDR-244] - License expired popup loop
- \* [PGDR-251] - [MOTOROLA DEFY] During a call, touch screen is disabled, even if phone is far from head
- \* [PGDR-253] - [SAMSUNG ACE] Ringtone doesn't play
- \* [PGDR-254] - Crash while in background on network reconnection
- \* [PGDR-257] - [HTC Devices] bad call quality on wifi network
- \* [PGDR-259] - Starting a call during entropy collection hangs-up Audio Subsystem
- \* [PGDR-266] - If SelfRegistration fails, incomprehensible message error is showed to the user
- \* [PGDR-274] - The Back button doesn't work during Activation Wizard

### Known Issues

- \* [PGDR-230] - PrivateGSM does not enlist contacts contained in SIM card

PrivateGSM Android - OEM editions - Version 10.6.2467

### New Features

- \* [PGDR-228] - Encrypt logs before sending via email
