Blackberry 10.5.2336

Release Notes

PrivateGSM Blackberry - All editions - Version 10.5.2336

New features

- [PGBB-572] - Call quality is shown on display, while call is in progress, with green/orange/red circles
- [PGBB-672] - Show elapsed time in real-time, while call is in progress
- [PGBB-681] - Send diagnostic logs via email to support@privatewave.com

Improvements

- [PGBB-632] - Battery usage optimization
- [PGBB-659] - Restrict accepted ciphers in TLS handshake to RSA certificates with AES256-CBC-SHA
- [PGBB-619] - Improved Logger performance
- [PGBB-667] - Configurable number of collected calls in call logs
- [PGBB-677] - Connection Wizard will set DirectTCP by default, instead of trying BIS-B which sometimes has very bad performances depending on RIM infrastructure

Fixed bugs

- [PGBB-622] - Skipping configuration wizard and manually set accounts leads to wizard restart at next launch
- [PGBB-623] - When device moves from "no network" to "network coverage" does not immediately reconnect to SIP server
- [PGBB-624] - License is not refreshed if device moves from "no network" to "network coverage" and license type is not known
- [PGBB-625] - User cannot dial a contact in address-book if number contains "()" or spaces
- [PGBB-637] - SelfRegistration set wrong password in user account on server
- [PGBB-642] - Calls recorded in call log with wrong timestamp and duration (hours or even days)
- [PGBB-648] - Progress bar is not shown during network and configuration wizards
- [PGBB-656] - User cannot dial using dialpad in main screen
- [PGBB-673] - No log file rolling
- [PGBB-678] - No immediate reconnection when a connection break is detected

Known and open bugs

- [PGBB-679] - PLATFORM BUG: AMR 4.75 does not work and freeze phone on OS 7.1 devices.
- [PGBB-685] - PLATFORM BUG: Curve 9360 does not manage AMR 4.75, only AMR 12.2
- [PGBB-680] - During a call, loudspeaker menu option has the wrong label on OS 7.1 devices

PrivateGSM Blackberry Professional - Version 10.5.2336

Improvements

- [PGBB-628] - Added a "delete ZRTP cache" menu in SipAccountSetting screen
- [PGBB-684] - Automatic activation is preselected as default choice in Professional Edition
