PrivateGSM Professional Invite features

Professional version of PrivateGSM provides some additional features that allows your contacts to easily try the application, simplifying installation and deployment process.

Inviting a contact to use PrivateGSM Professional

You can invite a contact from your phone book to use PrivateGSM. The contact will receive a text message with a link, inviting him to install the software.

BlackBerry

<table>
<tr><td>
</td><td>
</td></tr>
<tr><td>1. Select Invite others</td><td>2. Select a contact</td></tr>
<tr><td> </td><td></td></tr>
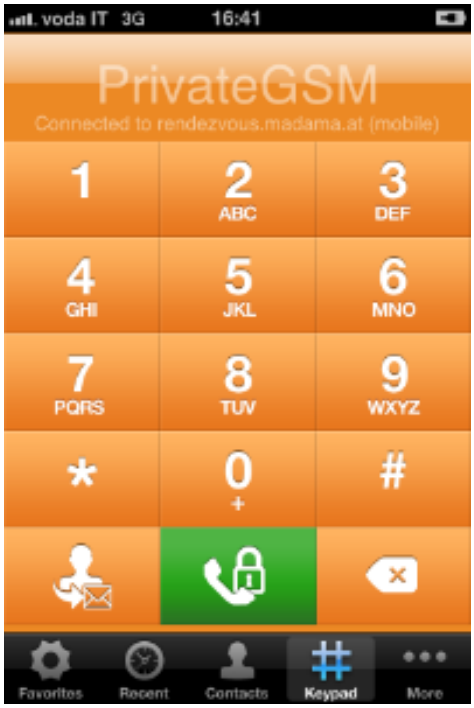
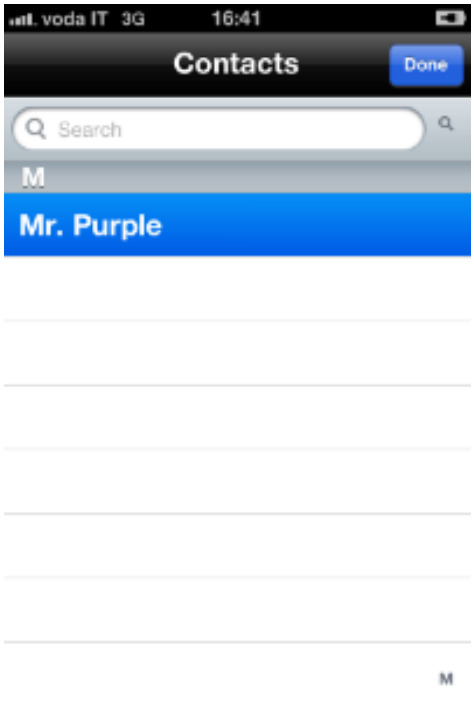
<tr><td>3. Invitation message is being sent</td><td></td></tr>
</table>

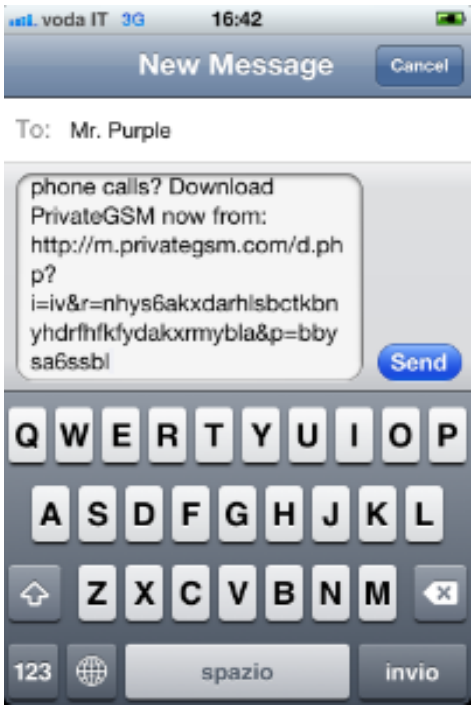
iPhone



1. Tap Invite icon (bottom left corner)

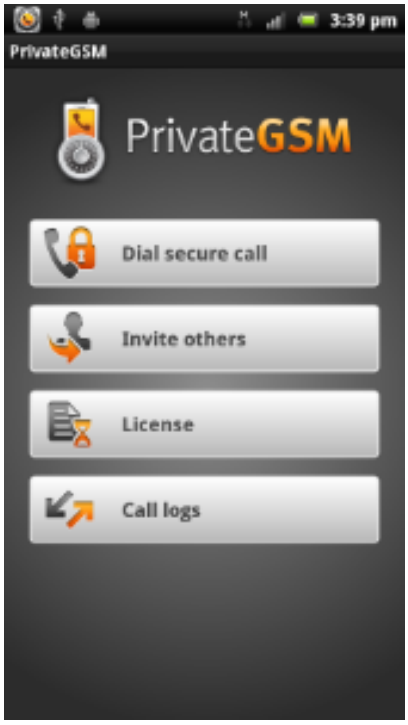


2. Select a contact

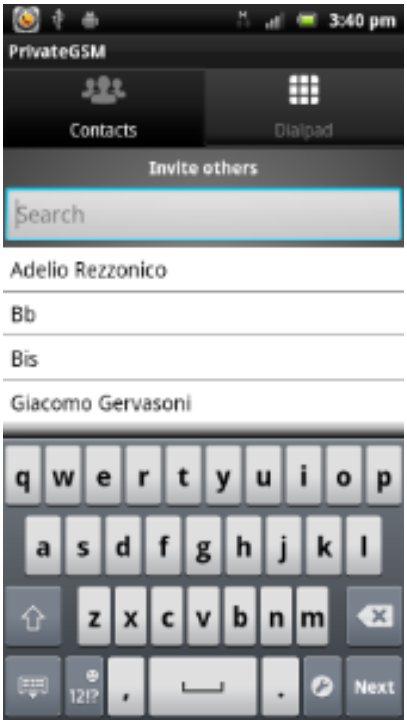


3. Confirm sending the invitation

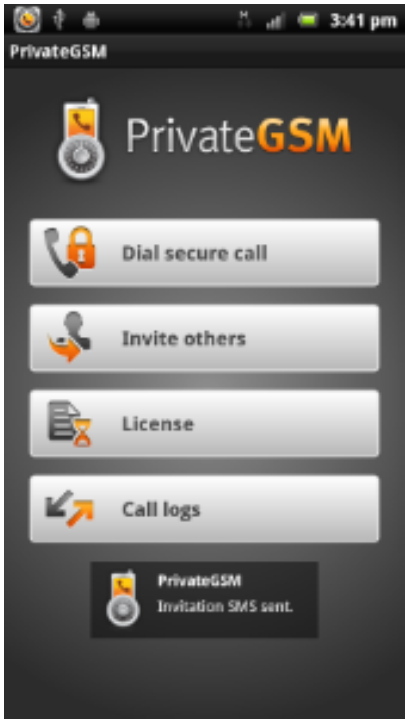
Android



1. Select Invite others



2. Select a contact

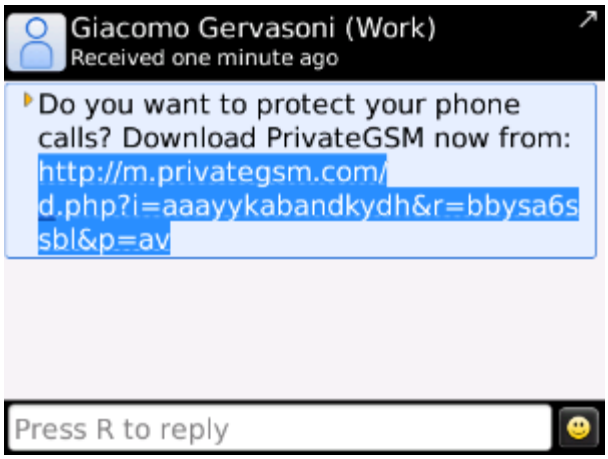


3. Invitation message is being sent

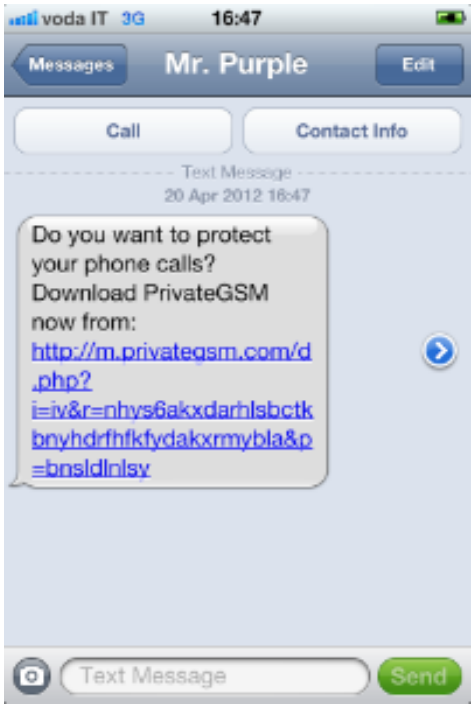
The invited contact needs only to click on the link in the message. If his mobile device is compatible the installation process will start.

Accepting an invitation

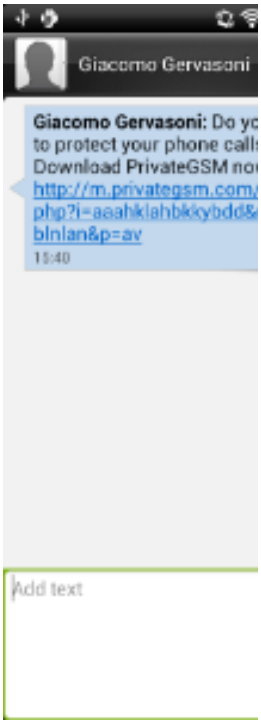
To accept an invitation to install PrivateGSM:



1. BlackBerry: click on the link and download the installation wizard



2. iPhone: tap on the link and the installation will be launched



3. Android: tap on the link a the installation will be laun

⚠ The "Invite others" option is available only for the Professional version, in order to allow users to build a contact network to make secure calls.
