Start PrivateGSM

PrivateGSM will automatically connect to secure VoIP server in the background each time you turn on your phone. When an Internet connection is available, you can:

- Start PrivateGSM application.
- Receive and dial secure calls.

On Android and BlackBerry devices it is possible to disable auto-start feature. It is not possible to disable it on iPhone devices.

> **To make a secure call the called party must have PrivateGSM running on his phone and be connected to the Internet as well!**

Start PrivateGSM on BlackBerry

To start PrivateGSM select PrivateGSM icon in the application menu.

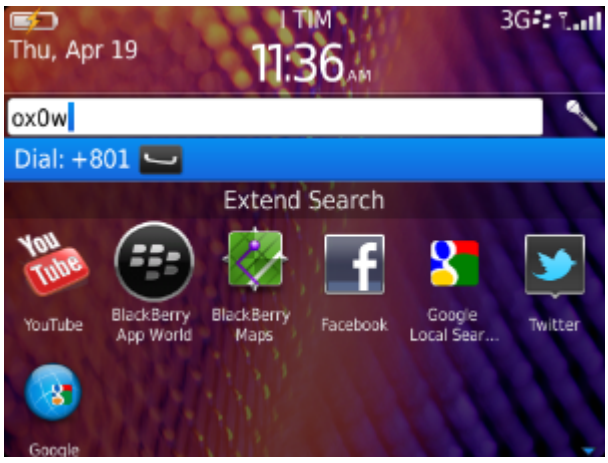
All other application functions are accessible from the PrivateGSM menu.

To open PrivateGSM menu on BlackBerry:

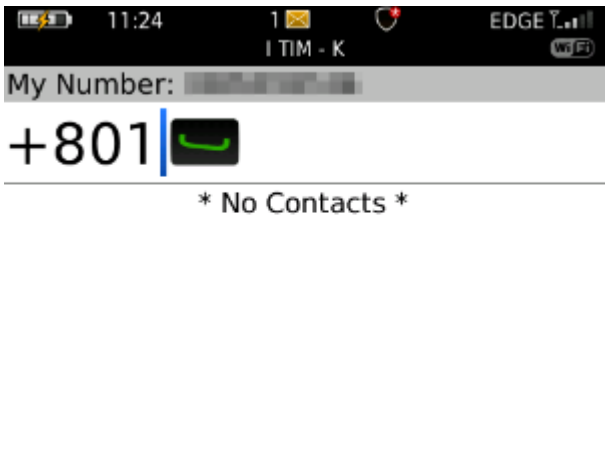
1. On Blackberry OS 7 select PrivateGSM icon from Application Menu

2. On Blackberry OS 5 PrivateGSM icon is under "Downloads" folder

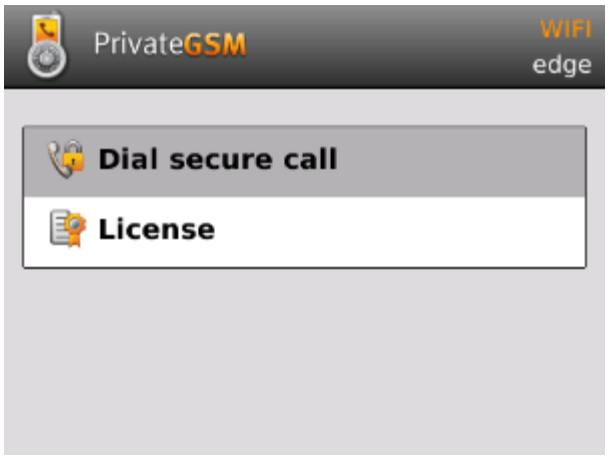
You can also start PrivateGSM from Blackberry by dialing +801 as you would do with a standard phone number.



1. Blackberry OS 7 - Dial "+801" and press the call button



2. Blackberry OS 5 - Dial "+801" and press the call button



3. PrivateGSM starts

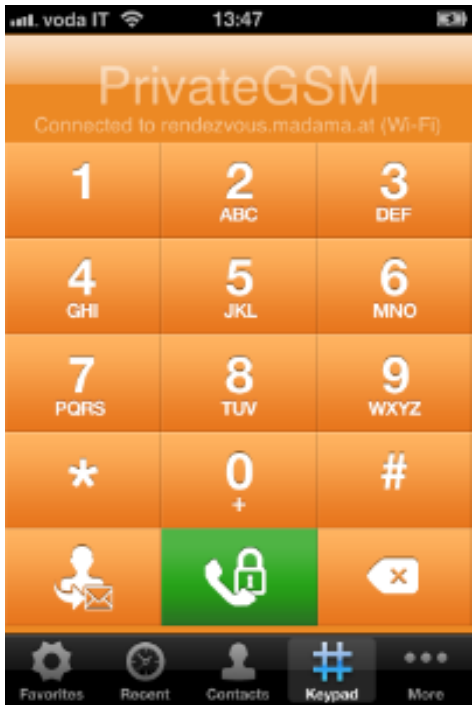
Start PrivateGSM on iPhone

All application functions are accessible from PrivateGSM main UI.

> Features based on *secure prefix 801* features are not available on iPhone due to platform constraints.

To open the PrivateGSM menu:

1. Locate PrivateGSM on the home screen



2. The application starts in keypad view

Start PrivateGSM on Android

To Start PrivateGSM from within Android just tap on PrivateGSM icon

	1. Tap on PrivateGSM icon	**2. The PrivateGSM menu appears**

Click Back button or Home button to return the application to the background.
