

# Blackberry 10.6.2491

## Release Notes

PrivateGSM - All editions - Version 10.6.2491

### New Features

- [PGBB-689] - Test network protocols versus SIP server

### Improvements

- [PGBB-705] - Initial wizard completes on license screen. Add button DONE to close wizard and move to main screen
- [PGBB-708] - If all packet lost, exit from application. If at least one packet return, show the error Screen but with a "continue" button
- [PGBB-711] - Enable, by default, obfuscation in all editions
- [PGBB-713] - Enable by default logging on clients
- [PGBB-715] - Refactored Logger in order to add two different log level (NORMAL - DEBUG)

### Fixed Bugs

- [PGBB-543] - many contacts, press touchpad over "more..." and nothing happens
- [PGBB-691] - Elapsed time is slower than realtime and shorter that actual cal duration
- [PGBB-697] - During a call, call timer display wrong duration
- [PGBB-698] - Date format in recent log is not localized
- [PGBB-699] - License expired popup loop
- [PGBB-701] - ContactsScreen search function select random contact
- [PGBB-706] - Add random data to UDP connection tester in order to avoid firewall protection against udp flood
- [PGBB-714] - The Back button doesn't work during Activation Wizard
- [PGBB-717] - If the user rerun network wizard (from settings menu, with account configured), the "check account" step is not skipped

### Known Issues

- [PGBB-716] - [OS 7.0] Initial wizard doesn't work with radio OFF - PGSM doesn't connect with radio OFF

PrivateGSM - OEM editions - Version 10.6.2491

### New Features

- [PGBB-694] - Encrypt logs before sending via email
