

PrivateServer 1.3.2660

Release Notes

PrivateServer - All editions - Version 1.3.2660

Improvements

- [PS-548] - Script /data/bin/collect-data.sh to collect and export server configuration data
- [PS-747] - Disables by default devel repositories and fedora mirrors
- [PS-748] - Silence obfuscation initialization notice in logs

Fixed Bugs

- [PS-743] - "none" is not a valid setting for codec allow/disallow
- [PS-744] - Watchdog calls time out instead of being hung up
