# Start PrivateGSM

PrivateGSM will automatically connect to secure VoIP server in the background each time you turn on your phone. When an Internet connection is available, you can:

- Start PrivateGSM application.
- Receive and dial secure calls.

On Android and BlackBerry devices it is possible to disable auto-start feature. It is not possible to disable it on iPhone devices.

> **To make a secure call the called party must have PrivateGSM running on his phone and be connected to the Internet as well!**

## Start PrivateGSM on BlackBerry

To start PrivateGSM select PrivateGSM icon in the application menu.

All other application functions are accessible from the PrivateGSM menu.

**To open PrivateGSM menu on BlackBerry, select PrivateGSM icon (on Blackberry OS 5 PrivateGSM icon is under "Downloads" folder):**
