

PrivateServer - 2.2.3446

Release Notes

PrivateServer - All editions - 2.2.3446

New Features

- [PS-895] - Find User by name/number
- [PS-999] - Highlight matching terms in account search page

Improvements

- [PS-868] - Error report if NTP sync fails
- [PS-957] - Export to CSV was inefficient
- [PS-949] - Default data retention policy for "SIP Session" records
- [PS-966] - Manage Tomcat crash log files

Fixed Bugs

- [PS-947] - When checking for possible updates the server does not report available changes
- [PS-954] - Deleting archived log entries takes up too much time and memory
- [PS-960] - No display of the users group in Call Detail Record list
- [PS-1001] - EXPIRATION and CONSOLE unregistrations don't log the address of the peer
- [PS-988] - cannot delete the data archive
- [PS-967] - Session log reconciliation fails on events linked to deleted accounts
- [PS-970] - PermGen space exhaustion during data archivation
- [PS-971] - Repository editor saves files with inconsistent line endings
- [PS-965] - CS-67: Removing the filter red cross after a search in Audit log gives an error page
