Docs changelog

A list of changes applied since release 3.0 of EVSS documentation:

- Data Retention
- Software update via User Interface
- Package repositories are configurable
- User management: new users must change their password at the first login
- Better CDR logging
- New devices and OS version certified
- Improved Asterisk debug support
- Improved troubleshooting documentation
- Roles and rights: data retention
- SIP Logs: new view and explanation of the reconciliation

Documentation tree and pictures changed:

1. Home page description: fig.1 changed
2. Roles -> data retention: ROLE__RIGHT_BACKUP explained
3. PSAM 3.2 Software Updates -> new section
4. added PSAM 2.8 Software Repositories
5. linked the above in the software updates
6. PSAM 3.3 Check Server Services -> part about asterisk removed (to be later added again as internal monitoring system explanation)
7. PSOM 1.0 Accounts and Groups -> images about accounts are updated. Also we added the part about the keep-alive server side
8. PSAM 2.4 -> added the NAT configuration and the explanation about the global keep-alive option configuration
9. PSAM 3.2 Software Update ->added the repo management and updates
10. PSOM 4.0 Logs -> added the data retention part
11. PSOM 4.0.1 -> rewritten the SIP logs (both img and text)
12. PSOM 4.0 Logs -> changed the images about the CDR. Added the description of the fields (i.e. the disposition list has been rewritten)
