

PrivateGSM Blackberry 11.1.2995

Release Notes

This is a maintenance release.

PrivateGSM - All editions - Version 11.1.2995

Improvements

- [PGBB-826] - Verbose logging for licensing is enabled only if the DEBUG logging level has been chosen
- [PGBB-820] - The Network Configuration Wizard tests all the network transports in the following order: DirectTCP, BIS-B (if available) and BES (if available)
- [PGBB-811] - Improved the Configuration Wizard robustness
- [PGBB-818] - Support for server keepalive to PrivateGSM

Fixed Bugs

- [PGBB-823] - Add compatibility for Blackberry 9320
- [PGBB-825] - An incoming secure call during a GSM call is not rejected automatically
- [PGBB-827] - HTTPS connection test is done against the hostname "https://rendezvous.privatewave.com" instead of the provisioned URL

Known Issues
