

# PrivateGSM Android 11.1.2994

## Release Notes

This is a maintenance release.

PrivateGSM - All editions - Version 11.1.2994

### New Features

### Improvements

- [PGDR-439] - Verbose logging for licensing is enabled only if the DEBUG logging level has been chosen
- [PGDR-403] - Improved the Configuration Wizard robustness
- [PGDR-417] - Support for server keepalive to PrivateGSM

### Fixed Bugs

- [PGDR-435] - Logger does not append new lines when is restarted
- [PGDR-441] - HTTPS connection test is done against the hostname "<https://rendezvous.privatewave.com>" instead of the provisioned URL
- [PGDR-409] - Dismissed the appearance of multiple "connection error" windows when PrivateGSM reconnects to the server

### Known Issues
