

PrivateGSM iPhone 11.1.1745

Release Notes

PrivateGSM - All editions - 11.1.1745

Improvements

- [IOS-434] - User Interface improvements.

Fixed Bugs

- [IOS-589] - No REGISTER has been sent to the server for 8 hours: "Unknown error 476241"
- [IOS-609] - "License Invalid" message has been showed to the user, even if the license is fine
- [IOS-613] - Can't place a call: "Rete assente" message is shown. Plus the connection to the server dies without warnings.
- [IOS-615] - The licence turns out as "invalid" after a network failure
- [IOS-618] - PrivateGSM receives the "keepalive" messages but does not send back a proper "Register" answer.
- [IOS-623] - It's not possible to answer if device is locked

Known Issues

- [IOS-626] - Removed the support for the iOS version 4
