

PrivateGSM iPhone 11.3.1966

Latest update

Unknown macro: 'page-info'

Release Notes

Main features introduced from this version on are: **"Presence"** and **"Audio Messages"**. But we also improved the management of the GSM calls over the private ones, addressed some security issues, improved the overall performance and performed some serious code refactoring.

PrivateGSM - All Edition - Version 11.3.1966

New Features

- [IOS-661] - Contacts View reports presence status for each contact shown: **"Presence"**
- [IOS-676] - Play audio notification on call hangup: **"Audio Messages"**

Improvements

- [IOS-669] - Use a persistent UUID in place of UDID for licensing purposes
- [IOS-674] - Log trace for the battery level
- [IOS-684] - Fill in the screen in iphone 5 with the splash screen
- [IOS-685] - Use a unique path for all the server services used by the mobile client
- [IOS-689] - Client logs are locally encrypted on client
- [IOS-690] - The stored SIP password is now encrypted
- [IOS-691] - Delete all logs files when the user disables the logging in PrivateGSM
- [IOS-694] - Improve user experience on RTP timeout

Fixed Bugs

- [IOS-544] - The changes in the Reachability status are now handled
- [IOS-649] - network broken/frozed events are no more reported as registration error instead of "no network"
- [IOS-651] - provisioned licence code ignored
- [IOS-672] - If a GSM voice call incomes, then the secure call is no more disconnected due to RTP timeout
- [IOS-687] - external CA-root certificate has been removed
- [IOS-696] - PrivateGSM is set to English language even if the phone is set to Italian
- [IOS-700] - Don't show the telephone number picker if calling a contact which has a single telephone number
- [IOS-702] - Call view stuck when ZRTP messages don't go through
- [IOS-707] - Automatic configuration does not always work after clicking on the link in the Activation text message
- [IOS-715] - No notification audio (INFO tone) were played on an RTP timeout

Known Issues
