

PrivateGSM Blackberry 11.3.3319

Latest update

Unknown macro: 'page-info'

Main features introduced from this version on are: "**Presence**" and "**Audio Messages**". But we also improved the overall performances and addressed some security issues.

Release Notes

PrivateGSM - All editions - Version 11.3.3319

New Features

- [PGBB-837] - Contacts View reports presence status for each contact shown: "**Presence**"
- [PGBB-862] - Play audio notification on call hangup: "**Audio Messages**"

Improvements

- [PGBB-861] - If a securecall is received during a GSM or SECURE call, the called device will show a missed call after voice hangup
- [PGBB-868] - Improved user experience on RTP timeout
- [PGBB-876] - Client logs are locally encrypted on client
- [PGBB-878] - Encrypt stored SIP password
- [PGBB-880] - Delete all logs files when the user disables PrivateGSM logging

Fixed Bugs

- [PGBB-835] - Initial configuration wizard seems sometimes broken
- [PGBB-836] - The wrong error message appears if a connection error occurs
- [PGBB-857] - Contact search does not match surname

Known Issues

N/A
