Release Notes

Present version introduces Secure Messaging on PrivateGSM Professional Edition, pairing it with the Enterprise. Please note that Secure Messaging System is end-to-site even on PrivateGSM Professional, but it's going to change toward an end-to-end crypto model on both versions.

GUI has been adapted to the new iOS graphical standards.

we also fixed some bugs on both versions.

PrivateGSM - All Editions - Version 14.0.2362

Fixed bugs

- [IOS-713] - Missing "refresh presence" button in Favorites screen
- [IOS-887] - Added UserAgent for iPhone 5S
- [IOS-891] - Proximity sensor was active on all views.
- [IOS-896] - Sending message impossible if the contact does not start with country code
- [IOS-885] - On incoming call sometimes no answering view was displayed.

Improvements

- [IOS-861] - Build with XCode 5 and SDK 7 (new GUI)

PrivateGSM - Professional Edition - Version 14.0.2362

New features

- [IOS-870] - Secure Messaging System on PrivateGSM Professional.

Improvements

- [IOS-793] - Invitation disabled for accounts which are not self registered.

Fixed bugs

- [IOS-900] - On PrivateGSM Professional one manual created account wasn't able to send and receive Secure Messages.
