PrivateGSM iPhone 14.1.2421

Release Notes

Current release improves usability during calls (control buttons on screen during call) and when dealing with Secure Message notifications. We also fixed occasional bugs.

PrivateGSM - All Editions - Version 14.1.2421

Improvements

- [IOS-879] - Improved in-call screen usability
- [IOS-816] - Reduced volume for keypad tone
- [IOS-904] - User can choose a specific number when adding one new contact to favorites
- [IOS-903] - User cannot, by mistake, reset his configuration when provisioned with read-only settings
- [IOS-910] - Skip license activation step in activation wizard if license code has been provisioned
- [IOS-930] - Open contact history when user click on message notification

Fixed bugs

- [IOS-797] - Sometime a valid provisioned Licence could result as expired until manually checked
- [IOS-833] - Occasional crash on network change, switching from Wi-Fi to 3G and vice-versa
- [IOS-853] - Clearing one single contact's history deletes whole history
- [IOS-867] - Missed Secure Call during a GSM call displays a blank row
- [IOS-860] - Occasional Secure Message problems about duplicate sequence
- [IOS-913] - Long name contact is poorly displayed if added to Favourites
- [IOS-914] - Increased User Interface retro-compatibility with iOS 6.x
- [IOS-928] - Better notification behaviour when a Secure Message has been received
- [IOS-929] - Show label "sending message" instead of "message sent", if message is still not sent

PrivateGSM - Enterprise Edition - Version 14.1.2421

Improvements

- [IOS-880] - Improved DTMF keypad usability and access
