

# PrivateGSM Android 14.1.3740

Latest update

Unknown macro: 'page-info'

## Release Notes

Current release improves usability during calls (control buttons on screen during call) and when dealing with Secure Message notifications. We also fixed occasional bugs.

### PrivateGSM - All editions - Version 14.1.3740

## Improvements

- [PGDR-785] - Skip license activation step in activation wizard if license code has been provisioned
- [PGDR-818] - Open contact history when user clicks on message notification
- [PGDR-800] - User cannot, by mistake, reset his configuration when provisioned with read-only settings
- [PGDR-646] - In "Favorites" view, phone numbers are all shown in one standard way
- [PGDR-802] - GUI uses just standard android home theme buttons
- [PGDR-821] - Multiple Secure Message delivery notification now shows how many new Secure Messages arrived
- [PGDR-825] - Show label "sending message" instead of "message sent", if message is still not sent

## Fixed Bugs

- [PGDR-830] - A call made during no network condition has timestamp 1st jan 1970
- [PGDR-811] - Some issues about Licensing has been solved
- [PGDR-705] - Audio messages (eg: "user called does not exists") are cut and you hear the last part.
- [PGDR-753] - No automatic reconnect in some circumstances, such as repeating automatic activation or after a network test
- [PGDR-808] - History size configured in provisioning profile is ignored
- [PGDR-822] - PrivateGSM hangs after clicking twice quickly on accept on screen protocol error

### PrivateGSM - Enterprise edition - Version 14.1.3740

## Improvements

- [PGDR-793] - Improved DTMF keypad usability and access

### PrivateGSM - Professional edition - Version 14.1.3740

## Fixed Bugs

- [PGDR-799] - Automatic Activation crashes in bad network conditions, eg: no coverage or intermittent connection
