PrivateGSM BlackBerry 14.1.3736

Release Notes

Current release improves usability during calls (control buttons on screen during call) and when dealing with Secure Message notifications.

PrivateGSM - All editions - Version 14.1.3736

Improvements

- [PGBB-977] - "New message" icon is now correctly displayed on all devices
- [PGBB-1011] - User cannot, by mistake, reset his configuration when provisioned with read-only settings
- [PGBB-1021] - Skip licence activation step in activation wizard if license code has been provisioned
- [PGBB-1023] - Multiple message notifications: tap and open contact history if messages come all from the same sender
- [PGBB-1026] - Show label "outgoing message" instead of "message sent", for messages in local queue waiting to be delivered to PrivateServer

Fixed Bugs

- [PGBB-940] - Screen does not turn off during an active PGSM phone call.

PrivateGSM - Enterprise edition - Version 14.1.3736

Improvements

- [PGBB-1001] - Improved DTMF keypad usability
- [PGBB-1013] - Improved interaction with "3-way Call" when adding a contact from contact list or from keypad
