

# PrivateGSM Manual Activation

Before you start using PrivateGSM you must configure a SIP account that has to be present and enabled on one PrivateServer. In this section you will be guided to execute the Activation Wizard that will help you to configure the software by simply providing the server address and the user credential (id and password). This is called **Manual Activation**.

- **SIP Server:** registrar hostname
- **Username:** SIP account assigned to you
- **Password:** password used to authenticate you

## BlackBerry

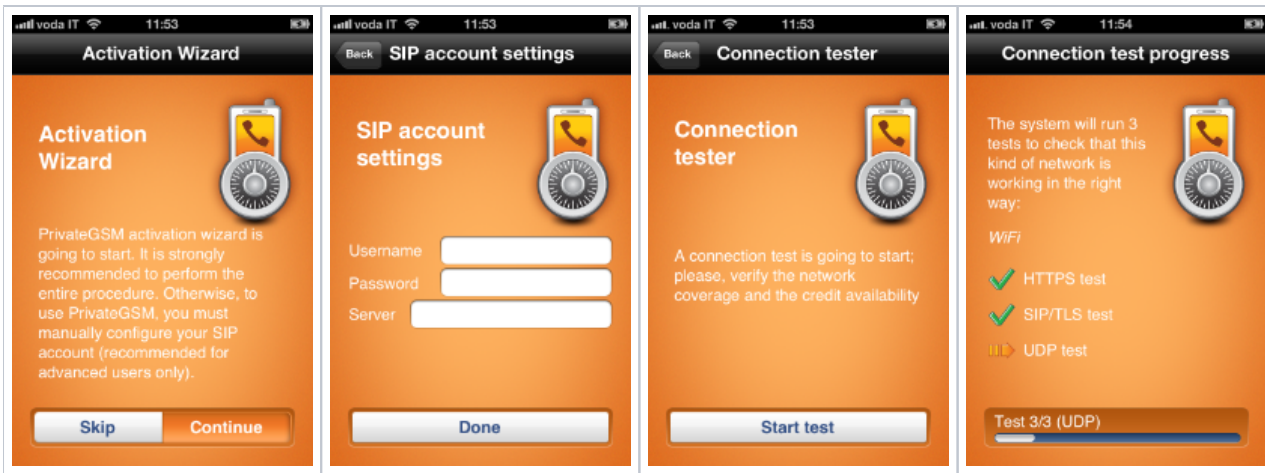

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Start Activation Wizard	Insert SIP account data	Start connection test	Connection test result
			
Step 5	Step 6	Step 7	Step 8
Connection test result	Check SIP account data	Activation Wizard end	Continue to PrivateServer
			

## iPhone

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Continue to start the wizard	Fill all the field and tap Done	Start network tester	The test progresses

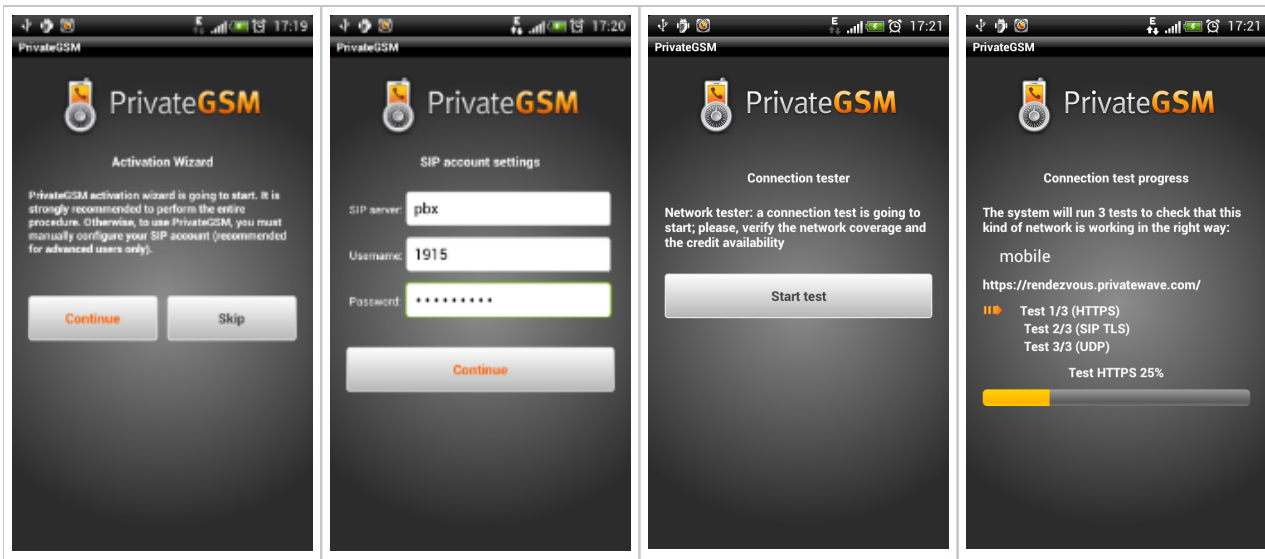

Step 5	Step 6	Step 7	Step 8
Tap "Continue"	Check your credentials	Activation complete	Tap "Done" to start using PrivateGSM

## Android

Start the activation wizard and insert your SIP account data. Before trying to connect to your SIP server, PrivateGSM will check your connection to Internet. If the network is correctly configured, PrivateGSM will check your SIP account data. If the activation wizard has been completed successfully, PrivateGSM is ready to use.

Step 1	Step 2	Step 3	Step 4
Start Activation Wizard	Insert SIP account data	Start connection test	Connection test progress

Step 5	Step 6	Step 7
Connection test result	Check SIP account data	Activation Wizard end
<p>The screenshot shows the 'Connection tester' screen. It states 'The network is now correctly configured.' and includes a 'WARNING: Check with your mobile carrier the Internet connection rates concerning these settings, to avoid extra or unexpected costs. By closing this procedure, the settings will not be saved.' There are 'Continue' and 'Retry' buttons.</p>	<p>The screenshot shows the 'Check account' screen. It states 'PrivateGSM is verifying the data. Wait for the result before proceeding. If the test fails, return to the previous screen and check the data. By exit the wizard you need to manually configure your account in order to use PrivateGSM.' A progress bar is shown with the text 'Opening Connection...'.</p>	<p>The screenshot shows the 'Check account' screen with a success message: 'The activation wizard has been completed successfully'. There is an 'OK' button.</p>
